

Routes through Cubelles

Plaça del Castell | Les Salines
Passeig de la Mar Mediterrània
River Foix Nature Area | Passeig Marítim

This route, which is under 8 kilometres long and takes less than two hours to complete, at a normal hiking pace, without counting stops, was created with the family in mind. It is very flat and presents no particular difficulties.

The route traverses a small agricultural area called Mars Mortes, so named for the standing water which used to accumulate in the plane due to shifts in the shoreline. This area will bring you face to face with the world of farming, and, in the shadow of the power plant's chimney, you will have the opportunity to see a clean form of energy (an animal-powered water pump).

Then comes the coast, where you will be able to enjoy the sea, the waves breaking against the shore and its characteristic smell as you stroll down Passeig de la Mar Mediterrània or across the sands of Mota beach to the River Foix Estuary. This area is part of the EU's Natura 2000 Network and has been declared a Special Protection Areas for birds. Here, in this beautiful enclave, a number of lookouts have been set up so that visitors can enjoy the area without harming the birds or plants.

After a stroll along the seafront promenade, you will head towards the mountains, cross the train tracks and enter the Gaudí gardens, where the children will have a great time playing on the swings. To end the route, you may visit the permanent exhibition on Charlie Rivel next to the Tourist Office in Plaça del Castell.
