

Routes through Cubelles

Plaça del Castell | Camí Ral | Serra de Sant Antoni
Turó del Avenc | Puigdetiula

This route is approximately eleven kilometres long and takes about four hours to complete. It takes you down the Camí Ral, parallel to the road C-31 in the direction of Tarragona, to La Solana, a small residential area, and then passes behind the Mas Guineu farmhouse.

Going past the Mas Peirot estate and entering the forest will prove quite an experience, as you will hardly believe you are so close to the sea. The trail winds its way through a dense and fairly new forest. And among the trees, for those with a watchful eye, you will see a shepherd's hut, called a mulassa in this area.

Almost without realising, you will reach the top of the Serra de Sant Antoni and Turó de l'Avenc, where you can search for a cave called L'Avenc de Sant Antoni. From here you will be able to see the Cal Santó farmhouse.

Afterwards, you will head up to another farmhouse, Puigdetiula or Puig de Tiula, as some people call it. This picturesque house has a very distinctive chimney. Keep going up until you come to the short-distance trail (PR 143; white and yellow markings), which will take you down to Cubelles through the town's largest pine forest. If you go out early in the morning, with a bit of luck you may even see squirrels.

Stick to the PR, as it is a comfortable, easy way of reaching Cubelles. And remember that in Plaça del Castell you can visit the exhibition on the clown Charlie Rivel.
